

## ÜBER DAS PRODUKT

The perfect attachment to lift loads that are not suitable for pallets or have unusual dimensions.

### VORTEILE

Manually adjustable

Easy lifting and transporting of various goods

### BESCHREIBUNG

Forklift cranes are ideal for use in the construction industry. With either a fixed or telescopic arm, they make lifting and transporting loads with unique shapes or that are unsuitable for pallets an easy task. This handy crane jib is compatible with forklifts, telehandlers and other machines. This forklift jib has a manually adjustable telescopic arm. Using the perfect fit for the job at hand is quick and easy with this versatile attachment.
